

# Sitcoflex pump connector

## Corrugated metal hose

---

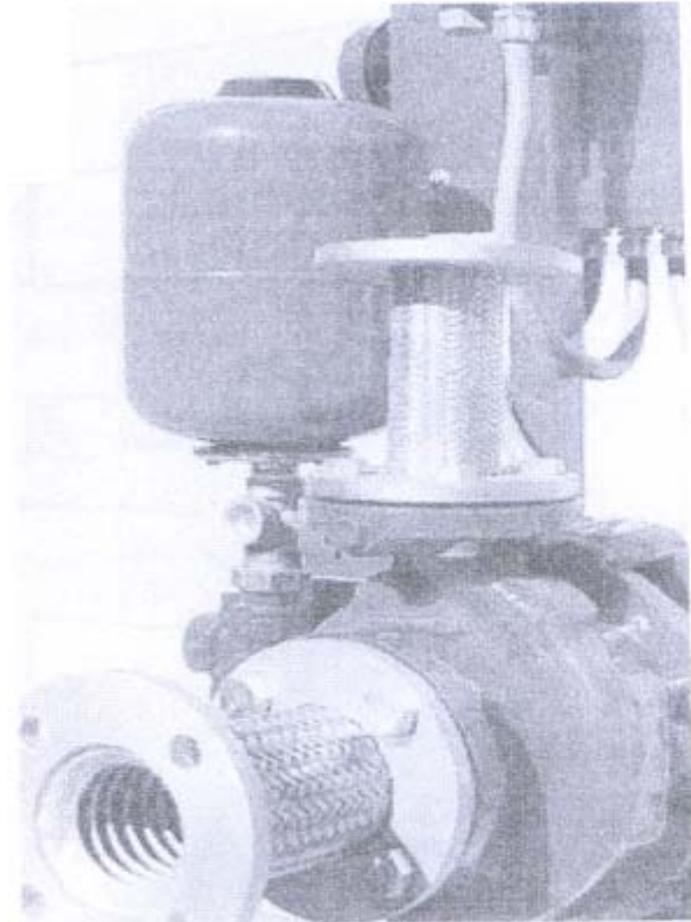

### **description**

SITCOFLEX manufacture a complete range of pump connectors are suitable for absorbing minor vibrations and reducing noise. They are easily installed and reduce the possibility of pump failure. Please refer to 'hose assembly lengths' data sheet where vibrations are heavy, constant or shock type.

### **manufacture**

SITCOFLEX pump connectors are manufactured from stainless steel braided corrugated hose and are fitted with flanges. The attachments are TIG welded. Standard length 150mm – for minor vibrations. Please refer also to 'hose assembly lengths' data sheet.
